

# Dockerfile for Springboot

```
FROM openjdk

WORKDIR /app

# Copy maven executable to work directory
COPY ./mvnw .
COPY ./mvn .mvn

RUN chmod +x ./mvnw

# Copy the pom.xml and download dependencies
COPY ./pom.xml .

# Copy over the project source
COPY ./src ./src

# Expose port 8080 for the app
EXPOSE 8080

# run the application
ENTRYPOINT ./mvnw spring-boot:run
```

This runs the spring boot app in a container
